S u b j e c t: Republic of Serbia – INDCs

Dear Ms. Cristiana Figueres,

Allow me to express gratitude to You and the UNFCCC Secretariat for the effort made during the negotiation process under the UNFCCC.

Recognizing the crucial importance of the global joint effort in combating climate change, I am pleased to announce that Republic of Serbia has developed the INDCs (attached), showing the willingness to contribute to global agreement and mitigation efforts.

Beside the mitigation, as a country hit by the catastrophic floods in 2014, we found very important to highlight the damages and losses caused by climate change, as well as our national needs in developing and implementing adaptation measures.

Please, accept assurance of my highest consideration.

Sincerely Yours,

Snežana Bogosavljević Bošković, PhD
MINISTER
